

DOMPÉ FOUNDATION ETS**CALL FOR APPLICATIONS FOR SCHOLARSHIPS****PREFACE**

The knowledge economy is profoundly changing our society in every aspect, at an unprecedented speed. Specifically, we are going through a phase of technological transition, driven by several factors: the possibility of access to shared computational resources, that was unthinkable just a short time ago (Cloud Computing and, in perspective, Quantum Computing); the availability of a very large amount of data, produced by an increasing number of connected intelligent objects (Big Data & Internet of Things); and the rapid development of advanced data analysis techniques and methodologies (Machine Learning & Deep Learning) as well as Artificial Intelligence.

In this context, science and innovation derived from science represent the most fruitful sources of the ongoing transformation. This process originates in universities and research centers and then grows and consolidates in businesses. It is a continuum that draws its value precisely from its inseparable coherence.

The Dompé ETS Foundation has chosen to be an active player in this change by investing in the university education of the most promising young people in STEM fields. Today, students embarking on the path of science must be able to train in a context capable of combining deep specialization with a multidisciplinary approach. The knowledge they acquire must integrate biology and life sciences, with the new perspectives offered by digital technologies, materials science, nanotechnology and other emerging technological fields. The university courses chosen by the Dompé ETS Foundation to establish its scholarships are inspired by these principles. The Foundation's commitment is in addition to Dompé farmaceutici's investments in R&D and innovative startups.

Without talent, there can be no progress. Without knowledge, there can be no development.

ART. 1 PURPOSE

1.1 The Dompé ETS Foundation intends to foster the human and professional growth of deserving university students and researchers, contributing both to the process of social mobility through the so-called "social elevator" and to the removal of barriers to access to university education for the less advantaged social groups.

Fondazione Dompé ETS

Via Santa Lucia, 6 - 20122 Milano, Italia / Tel. +39 02.58.38.3253 / e-mail: segreteria@fondazionedompe.org

Comitato scientifico: fd@fondazionedompe.org / pec: fondazionedompe@legalmail.it

Fondo di dotazione euro 600,000 i.i. - iscritta al registro imprese al n. 10583740963 - REA MI 2543558

The Foundation focuses on supporting individuals attending second- and third-cycle university programs characterized by innovation and experimentation.

1.2 The United States has been an undisputed leader in global scientific and technological progress since the second half of the 20th century. It is the country that has received the highest number of Nobel, especially in scientific disciplines. Scientific and technological cooperation between Italy and the United States holds strategic importance and involves some of the most esteemed public and private universities and research centers in both countries.

To highlight the importance of this relationship, in 2021 the Foundation launched a scholarship program for young individuals pursuing university degrees or research programs in the United States in the fields of neuroscience and/or neurobiology.

Building on this initiative, in 2025 the Foundation further expanded its commitment in the United States by establishing a new annual scholarship dedicated to a prominent figure in Italian scientific research worldwide: **Professor Renato Ugo**.

An internationally renowned chemist, Professor Ugo began his academic career as a scholarship recipient at the University of Milan, where he subsequently qualified as *Libero Docente* in General and Inorganic Chemistry (1966), then as Full Professor of Analytical Chemistry (1973), and finally of Inorganic Chemistry (from 1981 to 2010). He served as President of the Italian Association for Industrial Research (AIRI) from 1983 to 2019 and collaborated with some of the leading pharmaceutical companies in Italy.

1.3 For the reasons stated above, the Foundation has allocated a total sum of \$150,000.00 (one hundred and fifty thousand/00 dollars) for the establishment of two scholarships aimed at supporting a young individual pursuing a degree or research program in Organic Chemistry, Inorganic Chemistry, or Pharmaceutical Chemistry at a university in the United States, specifically:

- for a master's degree or research fellowship with a maximum duration of two years;
- for a doctoral degree (PhD) with a maximum duration of three years.

These scholarships will be awarded to Organic Chemistry, Inorganic Chemistry, or Pharmaceutical Chemistry students and researchers at U.S. universities.

Each fellowship will be in the amount of \$25,000.00 per year, for a maximum of three years.

1.4 For the promotion and dissemination activities of this Call for Applications, the Foundation relies on the valuable collaboration of the Embassy of Italy in Washington D.C.

ART. 2 RECIPIENTS

2.1 The recipients of the scholarships will be identified among individuals enrolled in a master's degree (one-year or two-year) or PhD degree, or undertaking a research fellowship at a U.S. university, in the fields of Organic Chemistry, Inorganic Chemistry, or Pharmaceutical Chemistry, which may possibly be conducted in partnership with U.S. research centers/agencies.

Applicants must submit a regular application, within the deadlines identified and as specified in this Call for Applications in art. 3.

- a) For the academic year 2026/2027, candidates will need to provide proof of their household's 2026 net income, which should not exceed \$120,000.00. The exemption from the payment of university fees does not disqualify candidates from being eligible for the Scholarship.
- b) Applicants must not have any working, collaborative, subordinate or para-subordinate relationship with Dompé farmaceutici s.p.a. and/or Fondazione Dompé ETS, either personally or indirectly.

2.2 Candidates who have submitted an application (see Art. 3.1) will be evaluated by representatives of the Foundation's Scientific Committee. The selection of scholarship recipients among the candidates will be discretionary and will take into consideration the research abstract, the motivation, curriculum vitae, skills, and interests of the candidate, as well as the prestige of the host university, with reference to the most accredited international rankings.

2.3 The Foundation will directly communicate the choice of scholarship recipients.

ART. 3 TERMS AND MODALITIES OF APPLICATION

3.1 Applications for this Call for Applications must be received at the Dompé ETS Foundation Secretariat using the online application procedure available at <https://www.dompefoundation.org/> no later than midnight on January 31, 2027.

3.2 The applications, as per art. 3.1, must be accompanied by the following documents properly labeled with the candidate's surname and attached in PDF format:

Fondazione Dompé ETS

Via Santa Lucia, 6 - 20122 Milano, Italia / Tel. +39 02.58.38.3253 / e-mail: segreteria@fondazionedompe.org

Comitato scientifico: fd@fondazionedompe.org / pec: fondazionedompe@legalmail.it

Fondo di dotazione euro 600,000 i.i. - iscritta al registro imprese al n. 10583740963 - REA MI 2543558

- A curriculum vitae in the European format;
- A cover letter in which the applicant should provide a complete description of himself/herself. This should include information regarding academic background, personality, hobbies and personal interests. The letter must be written using Times New Roman font, size 12- and 1.5-line spacing, and must not exceed two pages. The applicant's full name must be included in the header, and the letter must be signed at the end;
- An abstract of the research project the candidate will undertake during the master's, PhD, or research fellowship. The abstract must include a title and contain between 200 and 400 words. It must also include: the candidate's full name in the header; the name of the university where the candidate is pursuing his/her studies or research; the candidate's signature at the end of the document;
- Income Tax Return (US Form 1040);
- Application for admission to a master's or PhD degree, or research fellowship in Organic Chemistry, Inorganic Chemistry, or Pharmaceutical Chemistry at a U.S. University.

Applications with incomplete documentation, documentation in a format other than PDF, or documentation lacking a header and/or signature where required will not be evaluated.

ART. 4 REVOCATION OF THE SCHOLARSHIP

4.1 The Foundation will verify that each scholarship recipient attends the courses of study in which he/she is enrolled successfully, and/or achieves the objectives of the assigned research project within the specified timeframe. The scholarship recipient must submit, by the end of November each year, a written letter regarding the status of his/her studies, signed by the referring mentor/professor, which the Foundation reserves the right to verify by contacting the university itself.

4.2 The Scholarship will be permanently revoked:

if discrepancies are found between the recipient's declaration and his or her actual university, economic, financial or family situation. It should be noted that the awarded scholarship will be revoked if it emerges, at any time, even after the payment has been made, that the recipient does not meet the requirements indicated in articles 2.1, 2.2, 3.1, 3.2 and 4.1 (for example, if the recipient has not been accepted to the master's, PhD, or research fellowship, or if the family's income exceeds \$120,000.00);

4.3 In the cases set forth in art. 4.2, the Foundation will recover the amounts paid through the procedures provided for by law.

ART. 5 DISBURSEMENT OF SCHOLARSHIP FUNDS

5.1 The Foundation will disburse the annual scholarship contribution (equal to \$25,000.00 gross), net of any withholding taxes, in a single payment via bank transfer to the bank account provided by the scholarship recipient.

5.2 The scholarship winner must have a Italian tax identification number issued by the territorially competent Italian Consulate at the time the scholarship is disbursed.

ART. 6 PROCESSING OF PERSONAL DATA

6.1 The personal data provided when applying for this Call for Applications will be processed in accordance with current legislation on the protection of personal data (EU Regulation 2016/679 and subsequent implementing measures).

6.2 The Foundation, represented by the President *pro tempore*, will process personal data as an independent data controller, exclusively for the purpose of fulfilling the obligations related to the implementation of these regulations.

Milan, Italy, 28th September 2026

Dompé Foundation ETS

The President

Dott. Sergio Dompé
